How to send us your layout for a custom sequence.

Open xLights

Create a new Sequence

Select Animation

Select 40 FPS

Select Quick Start

Select File "Save Sequence As"

Set the name of the Sequence to "Blank Sequence". Pay attention to where you save it. I.E. What folder location you save it too. Here I saved it to the **Lightshow** Folder.

From the Menu Select Tools > Package Sequence

The Save Window pops up. Save the Packaged Sequence as "Blank Sequence"

Again pay attention to the folder where you saved this package. Here I am saving it to the lightshow folder again.

Retrieve the newly packaged blank sequence file. This is a .ZIP file and contains your layout.

Email this .ZIP. file to

info@fairypixeldust.com
